

Developer – West Region
Recurrent Energy
San Francisco, CA

Reporting to the VP of West Region Development, the Developer will be responsible for the development of solar photovoltaic projects by managing the definition, development, and execution of transactions in retail and wholesale power markets. The successful candidate will have knowledge and experience with managing transaction processes, strong communication and financial analysis skills and a proven ability to drive complex deals to closure.

Duties and Responsibilities

- Responsibilities include the management of and participation in financial modeling and analysis, creation of proposals and transaction execution.
- Define and manage the creation of clear and actionable deliverables such as financial models, term sheets and contracts from broad opportunities in order to capture and evaluate proposed commercial terms.
- Manage and oversee internal and external resources in the process of structuring, negotiating and closing project transactions including Power Purchase Agreements (PPAs), site leases, and Renewable Energy Credit (REC) contracts.
- Manage due diligence on projects, sites, and clients for development or acquisition projects.
- Evaluate and structure customer economic propositions by analyzing utility tariffs, commodity prices and other relevant market data.
- Analyze and interpret regulations, power economics, input prices and other data by market and provide input to the company's overall origination strategy.

Experience and Qualifications

- Successful track record of executing complex transactions and/or projects (preferably in real estate, asset development, or finance).
- Ability to summarize complex issues and opportunities into succinct and actionable terms.
- Demonstrated ability to translate contracts and financing agreements into concise financial and economic analysis.
- Strong team and process management skills with experience managing large cross-functional teams.
- Ability to prioritize tasks and effectively manage competing deadlines.
- 3-5 years of experience in energy development, finance or similar industries.
- 4 year degree required. MBA degree a plus.
- Detail-oriented with a strong sense of personal responsibility and ownership of work product.
- Highly driven and hard working individual with high standards for themselves and others.

Contact

Qualified candidates should submit an email cover letter with attached resume to: jobs@recurrentenergy.com. No calls, no recruiters please.

About Recurrent Energy

Recurrent Energy is an independent power producer and a leading developer of distributed solar projects for utilities, government, and commercial customers. Located in San Francisco, Recurrent Energy is helping to meet rising energy demand by developing a global portfolio of clean power plants located where they are needed most. The company has a pipeline of 2 GW of distributed-scale solar projects in development across North America and Europe.
